Weld Ends:	Tube: Square ends suitable for orbital welding Pipe: Square or bevel end options	
Testing & Inspection:	<ul style="list-style-type: none"> • Visual inspection • Surface roughness measurement • Helium-leak testing • Dimensional inspection 	
Marking & Traceability:	Each component is traceable to its producing mill and heat by an identification number etched within 24" (610mm) of one end.	
Labeling:	Each component's bag is affixed with a label identifying the component's part number, date and Valex lot number.	
Documentation:	A Quality Inspection Certificate is furnished with each shipment. The report contains the following information: <ol style="list-style-type: none"> Material composition & applicable specification designation Nominal outside diameter size Chemical composition Statement of quality assurance testing Inspection Certificate type 3.1 per EN 10204:2004 Lot & heat identification for traceability 	
Packaging:	All components are capped, bagged and packaged for shipment in such a manner which prevents damage to product and primary product packaging.
