

Maximum Data Center Uptime

Here's Why.

Valex Product Lineup:

Components

- Stainless Tube & Pipe
- Stainless Fittings
- Adapters, Clamps, Ferrules, Flanges, Barbs

Valves & Assemblies

- Cooling Water Valves
- Cooling Water Regulator/ Gauge Assemblies

Manifolds & Contract Manufacturing

- Process Cooling Manifolds
- Sub-level Component Custom Weldments
- Custom Processing & Engineering

Valex Corporate USA
6080 Leland Street

- **Reputable Manufacturer with Semiconductor Expertise**
Precision-engineered, high-quality, and proven components for Cooling Distribution Units & Water Distribution Cabinets.
- **Ready-to-Ship Inventory**
We keep a full stock of tubes, pipes, fittings, ferrules, clamps, hose barbs, and more—ensuring you have what you need to maximize system uptime.
- **Custom Sub-Level Weldments**
Engineered, precision, high reliability, welded assemblies tailored for your cooling system.
- **Custom Processing**
Maximizing uptime means minimizing failure points—every weld is a potential weak spot. That's why we offer passivation to enhance corrosion resistance at weld points on Valex welded parts.
- **Industry Approved**
Meets ASME BPE and SEMI standards.

Product Matrix

Finish Options:	Smooth drawn finish, mechanically polished, and electropolished options available.
Corrosion Resistance:	Passivation and electropolishing processing available.
Inspection:	Multiple surface and product quality inspections performed on all product lines.
Packaging:	Single bagged and ends capped for protection. Double bags for electropolished applications.
