

Stainless Steel **Tube, Pipe**
& **Fittings**

One Trusted Source - Worldwide

If ever there were industries with a low tolerance for imperfection, these would be our industries. As manufacturing processes grow more precise, our customers' needs for stainless steel piping systems evolve to ever more demanding levels of cleanliness, leak integrity, corrosion resistance, and surface finish. A consistent and reliable source for the highest quality components and assemblies is essential for success.

For over four decades, Valex has been the leading manufacturer of stainless steel tube, fittings, valves, and assemblies that allow our customers to meet their construction schedules and yield goals. Along the way, we've introduced the most important advances in fittings design, electropolishing, precision cleaning, and custom fabrications. With various manufacturing plants, each strategically located in major markets, Valex offers the largest capacity of any supplier. We are the only manufacturer of the full size range of products used by global customers - inch, NPS, and JIS sizes - all under Valex control.

Our unrivaled experience, in-house capacity, unmatched product breadth, and singular focus on only the most demanding industries have led customers around the world to the same conclusion - Valex is their **one trusted source**.

BA-S Finish

BA & AP Finish

BA-S Finish

401

EP Product Line

Valex Specification SP-9220

Applications

Ultra High Purity Systems requiring the highest grade of materials and certifications, Electropolished

Alloy

316L Stainless steel, single-melt or double-melt (seamless or welded, depending on size)

Sizes

ASTM Tube: 1/8" to 6"

ASTM Fittings: 1/4" to 6"

JIS Pipe: 8A to 300A

I.D. Surface Finish Options

A5: 5 µin Ra max

A7: 7 µin Ra max

B0: 10 µin Ra max

C0: 10 µin Ra

Tolerances

In accordance with ASTM: A 269 & A 632

JIS: G 3459 & G 3468

Weld Ends

Tube: Square ends suitable for orbital welding

Pipe: Square or beveled end options

Testing & Inspection

- Visual inspection
- Surface roughness measurement
- Helium-leak testing
- Scanning Electron Microscopy (SEM)

- Auger Electron Microscopy (AES)
- Election Spectroscopy for Chemical Analysis (ESCA or XPS)
- Particle testing
- Moisture testing

Marking & Traceability

Each component is traceable to its producing mill and heat by an identification number marked within 24" (610mm) of one end.

Labeling

Each component's bag is affixed with a label identifying the component's part number, date and Valox lot number.

Documentation

A quality inspection certificate is furnished with each shipment. The report contains the following information:

- Material composition & applicable specification designation
- Nominal outside diameter size
- Chemical composition
- Statement of quality assurance testing
- Inspection Certificate type 3.1 per EN 10204:2004
- Lot & heat identification for traceability

Packaging

All components are purged with UHP Nitrogen gas, capped, double-bagged and packaged for shipment in a cleanroom.

301

EP Product Line

Valex Specification SP-9223**Applications**

Ultra High Purity Systems, Electropolished

Alloy

316L Stainless steel, single-melt
(seamless or welded, depending on size)

Sizes

ASTM Tube: 1/8" to 6"

I.D. Surface Finish

10 μ m Ra

Tolerances

In accordance with ASTM: A 269 & A 632

Weld Ends

Square ends are suitable for orbital welding

Testing & Inspection

- Visual inspection
- Surface roughness measurement
- Dimensional inspection

Marking & Traceability

Each component is traceable to its producing mill and heat by an identification number marked within 24" (610mm) of one end.

Labeling

Each component's bag is affixed with a label identifying the component's part number, date and Valex lot number.

Documentation

A quality inspection certificate is furnished with each shipment. The report contains the following information:

- Material composition & applicable specification designation
- Nominal outside diameter size
- Chemical composition
- Statement of quality assurance testing
- Inspection Certificate type 3.1 per EN 10204:2004
- Lot & heat identification for traceability

Packaging

All components are purged with UHP Nitrogen gas, capped, double-bagged and packaged for shipment in a cleanroom.

LDEP

EP Product Line

Valex Specification SP-9235

Applications

Ultra High Purity Systems, Electropolished

Alloy

316L Stainless steel, single-melt
(seamless or welded, depending on size)

Sizes

JIS Pipe: 25A to 800A
ASTM/ASME Pipe: NPS 2 to NPS 24

I.D. Surface Finish

20 μin Ra average, 25 μin Ra max

Tolerances

In accordance with applicable ASTM, ASME & JIS specifications

Weld Ends

Square or beveled end options

Testing & Inspection

- Visual inspection
- Surface roughness measurement
- Helium-leak testing
- Scanning Electron Microscopy (SEM)
- Auger Electron Microscopy (AES)

Marking & Traceability

Each component is traceable to its producing mill and heat by an identification number marked within 24" (610mm) of one end.

Labeling

Each component's bag is affixed with a label identifying the component's part number, date and Valex lot number.

Documentation

A quality inspection certificate is furnished with each shipment. The report contains the following information:

- Material composition & applicable specification designation
- Nominal outside diameter size
- Chemical composition

- Statement of quality assurance testing
- Inspection Certificate type 3.1 per EN 10204:2004
- Lot & heat identification for traceability

Packaging

All components are capped, bagged and packaged for shipment.

CFOS

BA Product Line

Valex Specification SP-9234

Applications

High Purity Systems

Alloy

316L, 304L, or 304 Stainless steel, single-melt (seamless or welded, depending on size)

Sizes

ASTM Tube & Fittings: 1/4" to 6"

JIS Pipe: 25A to 800A

JIS Fittings: 15A to 800A

ASTM/ASME Pipe: NPS 2 to NPS 30

ASTM/ASME Fittings: NPS 1/2 to NPS 24

I.D. Surface Finish Options

AP: Annealed & pickled

ID40: 40 µin Ra Internal finish

IDMP: 200 µin Ra max internal finish

BA: Bright annealed

BA40: Bright annealed with 40 µin Ra internal finish

Tolerances

In accordance with ASTM, ASME & JIS specifications

Weld Ends

Tube: Square ends suitable for orbital welding

Pipe: Square or beveled end options

Testing & Inspection

- Visual inspection

- Surface roughness measurement
- Dimensional inspection

Marking & Traceability

Each component is traceable to its producing mill and heat by an identification number marked within 24" (610mm) of one end.

Labeling

Each component's bag is affixed with a label identifying the component's part number, date and Vallex lot number.

Documentation

A quality inspection certificate is furnished with each shipment. The report contains the following information:

- Material composition & applicable specification designation
- Nominal outside diameter size
- Chemical composition
- Statement of quality assurance testing
- Inspection Certificate type 3.1 per EN 10204:2004
- Lot & heat identification for traceability

Packaging

Packaged for shipment in such a manner, which prevents damage to product and primary product packaging.

444

EP Product Line

Valex Specification SP-9241

Applications

Ultra High Purity Systems in Extremely Corrosive Applications, Electropolished

Alloy

Nickel-Chromium-Molybdenum-Tungsten Alloy V22® (UNS Designation N06022)¹

Sizes

ASTM Tube Segments: 1/4" to 3/4"

I.D. Surface Finish

5 µin Ra

10 µin Ra

Tolerances

Outside diameter: ±.005"

Wall thickness: ±12.5% / -25%

Weld Ends

Square ends suitable for orbital welding

Testing & Inspection

- Visual inspection
- Surface roughness measurement
- Dimensional inspection

Marking & Traceability

Each component is traceable to its producing mill and heat by an identification number marked on the tube segment length.

Labeling

Each component's bag is affixed with a label identifying the component's part number, date and Valox lot number.

Documentation

A quality inspection certificate is furnished with each shipment. The report contains the following information:

- Material composition & applicable specification designation
- Nominal outside diameter size
- Chemical composition
- Statement of quality assurance testing
- Inspection Certificate type 3.1 per EN 10204:2004
- Lot & heat identification for traceability

Packaging

All components are purged with UHP Nitrogen gas, capped, bagged and packaged for shipment in a cleanroom.

Coaxial

EP, BA-S & BA Product Line

Valex Specification SP-9222

Applications

Contingent upon customers specifications

Alloy

316L, 304L, or 304 Stainless steel,
(Tubing & sleeves are seamless or welded,
depending on customers specifications)

Sizes

ASTM .250" to .750"
Tube: .750" to 2.50"
JIS 10A to 32A
Pipe: 25A to 40A

I.D. Surface Finish Options

A5: 5 μ m Ra max B0: 10 μ m Ra max
A7: 7 μ m Ra max C0: 10 μ m Ra

Tolerances

In accordance with ASTM: A 269 & A 632
& JIS: G 3459

Weld Ends

Square ends suitable for orbital welding

Testing & Inspection

Outer Tube:

- Visual Inspection
- Dimensional Inspection
- Outer Tube Leak Testing

Inner Tube:

- Per Vallex Specification: SP-9204, SP-9206, SP-9207, SP-9220, or SP-9223

Marking & Traceability

Each component is traceable to its producing mill and heat by an identification number.

Labeling

Each component's bag is affixed with a label identifying the component's part number, date and Vallex lot number.

Documentation

A quality inspection certificate for the inner tube is furnished with each shipment. The report contains the following information:

- Material composition & applicable specification designation
- Nominal outside diameter size
- Chemical composition
- Statement of quality assurance testing
- Inspection Certificate type 3.1 per EN 10204:2004
- Lot & heat identification for traceability

Packaging

Assembled product packaged per applicable specification.

Smoothing Out the Peaks & Valleys

When the highest levels of purity, corrosion resistance, and overall performance are required, customers select Valex UHP electropolished (EP) products. Under magnification, raw material surfaces appear rough, and composed of many “peaks and valleys”. During our EP process, surface metal is removed ion-by-ion, at an electron-microscopic level. Parts are subjected to an electrolytic solution and current, where surface material is selectively dissolved, more aggressively at the peaks than the valleys, smoothing out these undulations. The result is a micro-smooth and contaminant-free surface.

Electropolished surfaces benefit from increased corrosion resistance, and improved surface finish, resulting in increased production yields at customer sites. Our EP processes have been refined and tuned over multiple decades, to produce the most uniform, repeatable finishes – that are universally accepted as the gold-standard for which to compare.

Electropolishing

The Electropolishing Process

Valex electropolishing leaves the material surface microscopically smooth & essentially featureless.

Peaks are more aggressively removed due to higher current density

Microscopic surface profile before electropolishing

Microscopic surface profile after electropolishing

SEM photos at 500X magnification

Raw

Mechanically Polished

Electropolished

Quality

Tested Beyond the Standard

Product testing and certification are in strict accordance with industry-leading Valex specifications. Going well beyond our own requirements, we have brought sophisticated testing technology in-house, including Scanning Electron Microscope (SEM), and Electron Spectroscopy for Chemical Analysis (ESCA), to assure electropolish quality. Additionally X-Ray Fluorescence (XRF), and Optical Emission Spectroscopy (OES), verify metallurgical integrity and elemental composition of our alloys. These, and many other steps unique to us, add unmatched levels of control that assure Valex products not only meet, but exceed specifications and customer expectations.

Process

Processed for Success

Continued refinement and advancement is the inevitable progression for Valex-designed manufacturing equipment and processes. Over the years, these developments have resulted in the largest range of choice for size and surface finish options of ASTM, ASME, and JIS components available to our customers.

All of our products conform to identical Valex specifications, using the same proven processes and equipment at each of our three manufacturing facilities. Each facility consistently manufactures product exceeding performance requirements, while creating and maintaining Ultra High Purity using ISO Class 5 clean rooms with semiconductor-quality deionized water and nitrogen – assuring the highest levels of product integrity and performance.

1. Maximum safe working pressure is calculated, per ASME B31.3-2020, paragraph 304.1.2. Calculations assume maximum allowable O.D. and minimum allowable wall thickness (worst case scenario).
2. Material: TP304, TP 304L or TP 316L per ASTM A312
3. Temperature range used for above calculations is -20°F to 300°F, -28.8°C to 148.9°C. For recommended working pressures higher than 300°F (148.9°C), please consult factory.

Coaxial Tube, Pipe & Fittings

Coaxial Tube System

Valex pioneered the stainless steel Coaxial Tube System more than 30 years ago to meet the requirements set forth in codes and ordinances written at the inception of the semiconductor industry. Since then, we've gone on to design and deliver a full range of tube, pipe and fittings that "double-contain" toxic and hazardous gases for particularly dangerous processes. To provide absolute safety, all coaxial products are designed for automatic orbital welding in joint connections.

Offered In:

- Tube
- Pipe
- 90° Elbows
- 45° Elbows
- Equal Tees
- Reducing Tees
- Concentric Reducers
- Purge Tees
- Sleeves
- Weld Glands
- Terminators
- Bulkhead Fittings

Sleeve Assembly:

STEP 1: Lay out the assembly, and place a sleeve over one of the fittings. Weld the inner tube together, helium-leak test, and inspect the weld.

STEP 2: Slide the sleeve over the inner tube, so that it completely covers the gap between both outer jackets. Weld both ends, helium-leak test, and inspect.

Terminator Assembly:

STEP 1: Lay out the assembly, and place a terminator over the inner tube. Weld the inner tubes together, helium-leak test, and inspect.

STEP 2: Slide the terminator over the inner tube, so that it mates with the outer jacket of the fitting. Weld both ends, helium-leak test, and inspect.

Tube to Tube Assembly:

STEP 1: Lay out the assembly. Weld the inner tubes together, helium-leak test, and inspect.

STEP 2: Slide the outer jackets together, so they completely enclose the inner tube. Weld, helium-leak test, and inspect.

Coaxial Tube

ASTM A269 / A632

* Size is based on o.d. of inner tube.
** Gauge pressure is listed.

- Notes:
- Maximum safe pressure calculated per ASME B 31.3-2020, paragraph 304.1.2 (formula 3a). Calculations assume maximum allowable o.d. and minimum allowable wall thickness (worst case scenario) for the outer jacket only.
 - Pressures listed in the chart above are based on welded outer jacket material. Inner tube and outer jacket tube material per ASTM A269 TP 304L or TP 316L.

ONE Trusted SOURCE

Benefit From World Leadership

World class components from Valex don't just end at tube, pipe and fittings. Our product offerings extend to ball valves, instrumentation valves, headers, manifolds, and more. For more information, please visit our website at www.valex.com, or contact your Valex representative for details. Benefit from world leadership, and benefit from Valex.
